

Subtitle

# Title

**Student Name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

**Any other info:** \_\_\_\_\_

The order of modules within sections roughly corresponds to the order in which they're generated as tex. For example, putting the subtitle module before the title module results in the subtitle being rendered above.

Throughout the exam, you can use the following bangs: `gap` (which inserts vertical space), `img` (which inserts an image with the given filename and renders it at the given width), and `newpage` (self explanatory). Other bangs are specific to certain modules.

**Matching**

2 points each. Each choice will be used; some more than once.

<b>A</b>	Answer 1	<b>B</b>	Answer 2	<b>C</b>	Answer 3
<b>D</b>	Answer 4	<b>E</b>	Answer 5	<b>F</b>	Answer 6
<b>G</b>	Answers	<b>H</b>	Extra ans	<b>I</b>	Otherwise
<b>J</b>	Questions	<b>K</b>	The option	<b>L</b>	Unless

1. \_\_\_\_\_ Will automatically shuffle
2. \_\_\_\_\_ which are used more than once will only appear once in the wordbox
3. \_\_\_\_\_ This is question 6
4. \_\_\_\_\_ No dedicated answer sheet will be created
5. \_\_\_\_\_ You include 'noshuffle' as an option
6. \_\_\_\_\_ This is question 5
7. \_\_\_\_\_ This is question 3
8. \_\_\_\_\_ This is question 1
9. \_\_\_\_\_ This is question 4
10. \_\_\_\_\_ ans=sheet will create a separate answer sheet at the end
11. \_\_\_\_\_ This is question 2
12. \_\_\_\_\_ are sorted alphabetically, while

**True/false questions**

14. \_\_\_\_\_ A new section will create a page break.
15. \_\_\_\_\_ The true/false section is just like the matching, except no word bank is created
16. \_\_\_\_\_ And instead of lettering the choices in the word bank, the answer is either 'T' or 'F'
17. \_\_\_\_\_ Mars is blue
18. \_\_\_\_\_ America was founded in 1634
19. \_\_\_\_\_ This L<sup>A</sup>T<sub>E</sub>X tool is really cool and useful

**The title is Multiple Choice**

20. (2 points) New sections automatically
- A. z
  - B. Create a pagebreak
  - C. z
21. (2 points) Multiple choice questions
- A. z
  - B. automatically have answers shuffled
  - C. z
  - D. automatically have answers shuffled
  - E. z
22. (2 points) Unless you mark the correct answer
- A. with this symbol at the end:
  - B. Then the answer choice order
  - C. will be
  - D. preserved
23. (2 points) For shuffled questions, put the
- A. z
  - B. correct answer choice first,
  - C. followed by the bogus answers
24. (2 points) The spacing of MC questions depends
- A. on the available space on the page
  - B. which depends on how much instructions you wrote.
25. (2 points) So do me a favor and estimate the height taken up by the
- A. title and instructions
  - B. measured in units of pt
  - C. and include that as the option “intro-height”
  - D. z
  - E. z
  - F. z
26. (2 points) Better to overestimate than underestimate
- A. or else you might get some funky formatting
  - B. z
  - C. z
27. (2 points) The option “twocolumn” does what you think it does
- A. z
  - B. z
  - C. z
28. (2 points) The qworth option for MC and matching modules will print the pre-determined point-value
- A. for all questions.
  - B. To print point values for FRQ, see next section

**Free Response**

Write legibly

29. A question can have parts and subparts

- (a) Here is a part
- (b) Here is another part
  - i. Its first subpart
  - ii. Next subpart
- (c) Last part

30. (a) This question has no high-level question

- (b) It only shows these two question parts

31. You can put math here:  $y = mx + b$  or alternatively

$$i\hbar \frac{\partial \Psi}{\partial t} = -\frac{\hbar^2}{2m} \frac{\partial^2 \Psi}{\partial x^2} + V\Psi$$

if you like this better.

32. You can include commands from packages imported in the header. These come from the physics package:  
 $\nabla^2 \nabla \cdot \nabla \frac{d}{dx}$ 

33. Quotation “marks” and % symbols are preserved

34. (3 points) Indicate point values by preceding questions with curly bracketed numbers

- (a) question1
- (b) question2

35. You can also directly put some  $\text{\LaTeX}$  commands in here

sss

Lorem ipsum blah blah

If you want to insert your own L<sup>A</sup>T<sub>E</sub>X for whatever reason, you can do it here.

- item 1
- item 2

36. Back to some sweet

(a) free

(b) response

(c) questions!

37. By default, no answer sheet is generated at the end of the exam. You must use the ans option to specify if you want an answer sheet for a given question module

38. But of course, every question module shows up in the answer key

Age	Height
11	5'2"
13	5'3"
14	5'6"
16	5'8"
18	5'9"

**Answer Sheet**
